

TPO Technologies

# TPOAssist

Trusted Partners

## Who We Are

TPO Technologies is a purpose-built, cyber security company servicing government departments and large enterprise organisations.

We are here to flip the narrative on the way you deliver Cyber Security outcomes to your business. We offer start-to-finish engagements, **solution advice, implementation services, ongoing platform management and procurement services.**

Regardless of your preferred infrastructure platform, cloud, hybrid or on-premise, TPO has the required expertise to ensure your project success.

We are proudly a Queensland based company, employing Queenslanders, in support of Queensland businesses.

## Why TPO and Palo Alto

### A Safe Pair of Hands

TPO's Leadership team has worked with the Palo Alto Networks sales team for years across clients in government departments, universities and large enterprises. Honest collaboration is built into each project. Ask the Palo Alto Team about us.

### From the Ground Up

TPO knows the SASE journey is measured in years and projects, not months and a single project. Both TPO & Palo Alto can help organisations understand the complete process, the commitment and budget required.

### Trust. Provide. Outcome

Allow TPO and Palo Alto to build and maintain a trusted partnership over the lifecycle of this technology in your organisation. Long term deliverables vs myopic outcomes are at the heart of why we work together for clients.

Palo Alto Networks, the global cybersecurity leader, continually delivers innovation to enable secure digital transformation—even as the pace of change is accelerating.

## Prisma SASE

### Prisma Access

Securing access everywhere with best-in-class protection for all users, apps and data.

### Prisma Access Browser

The secure browser for both managed and unmanaged devices. Prisma Access Browser extends SASE protection seamlessly to every device, bringing unmatched agility, security, and control to your business.

### Prisma SD WAN

Realize better application performance, integrated security with Zero Trust and branch simplicity with best-in-class SD-WAN.

### SaaS Security

See and secure all your SaaS apps - including GenAI and modern collaboration apps - prevent sensitive data loss and protect your users everywhere.

### Autonomous Digital Experience Management

Gain instant visibility into the health and performance of users, branch sites, applications and IT infrastructure to proactively find and remediate performance issues from a single unified dashboard.

Palo Alto Networks named a Leader again—in the 2024 Gartner® Magic Quadrant™ for Single-Vendor SASE.

Trust. Provide. Outcome
