TPOAssist

Who We Are

TPO Technologies is a purpose-built, cyber security company servicing government departments and large enterprise organisations.

We are here to flip the narrative on the way you deliver Cyber Security outcomes to your business. We offer start-to-finish engagements, **solution advice**, **implementation services, ongoing platform management and procurement services.**

Regardless of your preferred infrastructure platform, cloud, hybrid or on-premise, TPO has the required expertise to ensure your project success.

We are proudly a Queensland based company, employing Queenslanders, in support of Queensland businesses.

Trusted Partners

SentinelOne

SentinelOne redefnes cybersecurity by pushing the boundaries of autonomous technology. The Singularity™ XDR Platform encompasses AI-powered prevention, detection, response, and threat hunting across user endpoints, containers, cloud workloads, and IoT devices. Enabling modern enterprises to defend faster, at greater scale, and with higher accuracy across their entire attack surface, we empower the world to run securely.

Why TPO and SentinelOne

A Safe Pair of Hands

The TPO Leadership Team has collaborated with the SentinelOne team and technology since its arrival in the Australian market.

From the Ground Up

TPO can assist your organisation from the beginning of your SentinelOne partnership. Whether it is onboarding services or a quarterly health check, we are ready to help.

Trust. Provide. Outcome

Allow TPO and SentinelOne to build and maintain a trusted partnership over the lifecycle of their technology in your organisations. Long term deliverables vs myopic outcomes are at the heart of why we work together for clients.

AI SIEM for the Autonomous SOC

Secure your entire organization with the industry's fastest AI-powered open platform for all your data and workflows—built on the SentinelOne Singularity™ Data Lake.

- Separate compute & storage for cost effective logs & retention
- Built for SaaS benefits: bult on modern architecture such as real time protection, speed and scalability
- Standalone ingest capabilities regardless of the Endpoint, Detection & Response you have on your endpoints
- No-Code Automation for SecOps
